CHUANGO G5PLUS

Domestic alarm kit - Touch panel with GSM module - Sending alerts by SMS and phonecall - Volumetric PIR Detector - 2 Magnetic door/window contacts - Includes 2 remote controls and 2 RFID cards

Complete wireless alarm system, with communication of messages via phone card. You only need to have GSM coverage to keep an eye on your home or business. And without any fee or monthly subscription, you will receive notice alerts on your mobile phone, sent directly by the alarm. Moreover, being completely wireless, there is no need to connect any equipment with cables.

This great kit has everything you need to install an alarm by yourself to alert your mobile phone about any attempt of theft or intrusion. It consists of a control panel, a PIR motion sensor, two door/window opening detectors, two remote controls and two RFID proximity cards.

You can furthermore download the manufacturer's application for free, to configure, arm and disarm the system in an easy way with your iPhone or Android smartphone.

- Made in methacrylate and front touch with keypad
- GSM module, you only have to insert a GSM phone card from any operator
- The control panel will call or send an SMS in case of any event
