CHUANGO SPS-260

Solar outdoor siren - Wireless - Internal antenna - Power 110 dB - Suitable for exterior use - Solar panel power supply

Siren 110 dB suitable for outdoor, powered by solar panels, with flashing light. It communicates wirelessly with the alarm panel, and hereby when an intrusion or event is detected, besides sounding the internal siren of the panel, this powerful siren will also sound and light.

It is the ideal complement to any alarm system, as the main function of these systems is to scare off potential intruders or alert in case of external event. And without any doubt, the siren will help fulfill this mission perfectly.

- - Valid for exterior
- - Wireless connection 433 MHz with the panel with a maximum reach of 80 m
- - Solar panel power supply, no additional power required
- - Battery of 3.7 V for backup in case of no solar light
- - Two operation modes: Connected to panel, or independent (directly to detectors)
- - Capacity of 110 dB and flashing light
- - Equipped with tamper
