Retrofit/loop process calibrator - LCD display up to 20000 accounts - Measures and generates feedback voltages - Measures and generates feedback voltages - USB communication available - Automatic shutdown

- UNI-T
- Multifunction loop/feedback process calibrator
- Measures and generates feedback/loop voltages and currents
- Designed with 0,02 % accuracy, adjustable backlighting and automatic shutdown
- Especially suitable for calibration, repair and maintenance of industrial control systems
- LCD display up to 20000 accounts
- Passage/ramp functions
- Rechargeable battery
- Contrast adjustment
- Automatic shutdown (adjustable time)
- USB communication
- Stores and retrieves configurations
