MARCA BLANCA WC001A-4

Webcam - Resolution 4Mpx - 85° Viewing angle - Integrated microphone - USB 2.0 - Plug & Play

Webcam with 4Mpx resolution and integrated stereo microphone. Completely Plug & Play USB connection.

It is equipped with a 1/3" CMOS sensor with a resolution of 4Mpx and image processing that automatically compensates for brightness and contrast to achieve the best results even with backlight. You get a wide 85° image from the 3.6 mm and F2.0 lens. The image format is widescreen 16:9 to fit the most common screens. The video is compressed in MJPEG format in real time, obtaining a fluent and natural video.

A stereo microphone transmits the audio clearly by applying intelligent background noise reduction. Efficiently captures sound up to a distance of 6 m.

The USB 2.0 connection guarantees the correct transmission of the video in a quick and easy way. No additional driver installation required. It is Plug & Play. Plug & Play. The length of the USB cable allows the camera to be placed at up to 1.7 m of distance. No additional power supply required as it is powered via the USB connection.

The camera has a clip clamp mount and an additional flexible foot offering multiple placement

options. It also includes a lid over the lens, to ensure privacy when the camera is not in use or is activated by mistake.

The webcam is designed for videoconferences, webinars (online courses), video and audio streaming or to create videos from a software. It is compatible with the most popular software and applications such as OBS, Skype, Zoom, Jitsi, Youtube, Twitter, Twitch, etc. It can be used with computers, both PC and Mac, as well as with other devices via USB, being compatible with operating systems such as Windows, MacOS, Android, smart TV and Chrome OS, among others.
