SAFIRE CON116

Safire connector - BNC for soldering - Adapted to RG59 - It includes shrinkable tube - Protection housing - Optimum connection

Safire BNC male connector for welding.

The center conductor of the cable is soldered directly to the connector and the mesh is fixed by compression of the part for this purpose, so the connection is made optimal, ensuring continuity. It includes shrink tube sleeve for a stronger fixation. Golden connection areas to ensure corrosion resistance. Connection size of the cable adapted to RG59.
